

Initial Meeting Notes

Creative Director: Mimi Shang

Topic: Tea

We wanted to specifically focus on the natural qualities of tea instead of its packaged form. For the website, we looked at the Wikipedia page and discussed what information can be used in the webpages. We also looked at sample websites to base a style on and decided on using simple vectors and colors to convey the topic. We decided on a main home page with navigation tabs at the top to flip between the different components of tea

My topic: Mario

Creative Director: Christina Lu

Designer: Mimi Shang

For my website, I wanted red to be a dominant theme in my website. I also want it to convey a playful meaning as it goes through Mario's history, his games, and the legacy he left behind. Similarly, I also want a homepage with the navigation bar to switch between different components of the character and employ a minimalistic interface.
